- Easy to operate & maintain

100 mm Drum-Style Gravity-Feed Wood Chippers

The TOMCAT Model 100 wood chipper looks small, but is built to the same standard as its bigger counterparts and will outperform any competitive product in its size range in terms of running costs, durability and efficiency. Currently the smallest wood chipper in our range. A simple & lightweight design with minimal maintenance makes this chipper a must-have for every small holding, nursery or landscaper. The petrol engine is extremely fuel-efficient, easy to service and will ensure years of dependable service. Extremely low maintenance- and running costs on the whole unit. Easy to move around on site and operate. A swivel discharge chute allows the operator to change the direction of the chip discharge and the chip deflector is easy to adjust. The narrow design on the Model 100 CDT allows it to get through narrow gates and into back gardens without any hassle. The Model 100 CDE is also available on an SABS roadworthy trailer.

100 mm | KG 250 | 2.0L x 0.7W x 1.55H | PETROL | 13HP

100 mm | KG 425 | 3.25L x 1.62W x 1.8H | PETROL | 13HP
