- Weight: 1500kg

### 6 Cube Tip Trailer

Our 6000 CT is a 6 cubic metre heavy duty tip trailer. This is an independent tip trailer using its own hydraulic system. Fitted on a well balanced roadworthy double axle 3.5 ton trailer. It's built to transport wood chips and made for chippers to discharge directly into the bin from the back. It's got 2 ramps below the loading deck that can be pulled out and hooked in when smaller equipment needs to be transported inside. The sides are detachable and the back opens easily. A 13HP Yamaha petrol engine supplies the power to drive the hydraulics. The engine is light on fuel and the tipping function is extremely easy to operate. It comes with a spare wheel for added peace of mind.
